## SERVICE AND REGULATORY ANNOUNCEMENTS. BUREAU OF ANIMAL INDUSTRY.

JULY, 1922.

[This publication is issued monthly for the dissemination of information, instructions, rulings, etc. concerning the work of the Bureau of Animal Industry. Free distribution is limited to persons in the service of the bureau, establishments at which the Federal meat inspection is conducted, public officers whose duties make it desirable for them to have such information, and journals especially concerned. Others desiring copies may obtain them from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 5 cents each, or 50 cents a year. A supply will be sent to each official in charge of a station or branch of the bureau service, who should promptly distribute copies to members of his force. A file should be kept at each station for reference.]

**NOTICES REGARDING MEAT INSPECTION.****REMOVE CROWNS FROM HOG-BUNG CASINGS TO BE USED AS CONTAINERS OF SAUSAGE FOR CANADA.**

The Veterinary Director General of Canada invites attention to a ruling which was issued by the Canadian Health of Animals Branch in December, 1921, that "crowns must be removed from all hog bungs used for sausage," and requests that this ruling be observed in the United States with respect to containers of sausage forwarded to Canada. Inspectors in charge will be governed accordingly in certifying to sausage intended for export to Canada.

**FRESH PORK ORGANS FOR GREAT BRITAIN.**

Referring to the item in Service and Regulatory Announcements of April, 1922, page 43, entitled "Fresh pork for Great Britain," fresh edible pork organs such as kidneys and livers, intended for export to Great Britain, are classed for inspection and marking purposes as *fresh pork* and are eligible to admission into that country only when obtained from carcasses free from disease and free from tuberculosis in any degree and when received in containers bearing the modified meat-inspection stamps.

**SANITARY HANDLING OF OLEOMARGARIN.**

For sanitary reasons and to improve its keeping qualities, oleomargarin should be manufactured and packed without the product's coming in contact with human hands. Many establishments are now producing oleomargarin by methods which eliminate its being touched with the hands, and the feasibility and practicability of this attainment have been fully proved. Inspectors in charge will cooperate with the managements of establishments to the end that this practice may become universal.

**DUMMY PACKAGES OR EMPTY CONTAINERS FOR DISPLAY.**

The distribution of dummy packages or empty containers bearing the inspection legend is not permitted unless specifically authorized by the Washington office. It is further required that previous to the distribution of such containers for display purposes the inspection legend be effectively canceled, or the containers so prepared as to render their future use as containers of meat or meat food products impracticable. Requests for such distribution should therefore be accompanied by samples indicating the manner in which the legend is canceled or full information as to the manner in which the containers are to be rendered unfit for use.

#### Licenses Terminated.

U. S. Veterinary License No. 85, issued January 1, 1921, to the Western Laboratories, French Camp, Calif., was terminated July 3, 1922, on account of change in name of the firm operating the establishment. A license of the same number was issued on the same day to the Western Laboratories Serum Farm covering the same establishment.

U. S. Veterinary License No. 162, dated March 26, 1921, May 13, 1921, August 1, 1921, September 30, 1921, May 13, 1922, and May 29, 1922, respectively, issued to the Monarch Biological Laboratories, Kansas City, Mo., were terminated July 28, 1922, on account of change of location of the establishment. A license of the same number was issued to the company as indicated in the foregoing.

#### License Suspended.

U. S. Veterinary License No. 32, held by the Standard Serum Co., 9-15 South Second Street, Kansas City, Kans., was suspended July 20, 1922, on account of the firm having violated the department's regulations promulgated for the purpose of determining whether or not the potency and purity of antihog-cholera serum are satisfactory before its release for marketing. This suspension covered a period of 15 days beginning July 21, 1922.
